

SHK Weaving Technology Co., LTD

The Finest Weaving, Crafted with Distinction

SHK weaving

SHK Weaving Technology Co., LTD

COMPANY PROFILE

SHK Textile Technology Co., Ltd. is a leading professional weaving company founded by Taiwanese and Japanese enterprises. With over 40 years of expertise in weaving and production, we specialize in the manufacturing of high-quality woven tapes. Our capabilities extend to both OEM and ODM business models, allowing us to meet diverse customer needs.

At SHK Textile Technology, we offer a vast range of over 500 different types of woven tapes. Our products find extensive applications across various industries, including general apparel, medical supplies, and industrial safety solutions. With our commitment to innovation and craftsmanship, we deliver woven tapes that meet the highest standards of quality and functionality.

Our company's rich heritage in weaving technology, coupled with our ability to adapt to evolving market demands, positions us as a trusted partner in the textile industry. We continuously strive to provide customized solutions, exceptional service, and reliable products to our valued clients.

Join us at SHK Textile Technology and experience the art of weaving combined with uncompromising quality for your business success.

Industry position

TOP1

NO.1 in the professional weaving technology industry

Core business

Professional ribbon weaving

We are the leading professional ribbon manufacturing company jointly established by Taiwanese and Japanese enterprises, offering OEM and ODM business models.

We provide over 500 types of ribbon products, which can be widely applied in various commercial fields.

Strategic positioning

Leading in China、Japan、Vietnam

Leading Professional rubber band Manufacturing Company in China, Japan, and Vietnam

Four Distinct Advantages that Condense the Professionalism of the Ribbon Industry

4

1

Customer service

Providing exceptional customer service is the key to earning trust and reputation. We uphold this philosophy throughout the entire process, from order placement to final delivery, to promote sales growth and long-term business development.

2

Innovative development

As a company that caters to both OEM and ODM business models, we have over 40 years of experience and continuously strive for innovative development. With a product portfolio of over 500 types of ribbons, we cater to various industries such as apparel, medical, and industrial safety.

3

Quality requirements

We have maintained a deep collaboration and long-term supply to the Japanese market, adhering to 100% strict Japanese quality standards to ensure that the quality of every meter of our products meets the requirements.

4

Cost-effectiveness

We always adhere to comprehensive and high-quality production control, aiming to achieve the most competitive price advantage while maintaining the same level of quality.

PRODUCT DETAILS

DETAILS

Jacquard Ribbons

Jacquard ribbons are crafted using materials such as polyester, nylon, PP, and acrylic. They feature intricate patterns, a smooth texture, excellent strength, durability, colorfastness, and shape retention.

Shoelaces

Shoelaces are used to fasten shoes, decorate shoe uppers, adjust shoe tightness, and ensure ankle safety. They provide ample space for foot development, especially for young people whose foot width and thickness change during their growth.

Elastic Bands

Elastic bands are ideal for clothing accessories such as underwear, pants, baby clothes, sweaters, sportswear, wedding gowns, T-shirts, hats, bras, masks, and more. They are widely used in clothing cuffs, hems, bras, stockings, waistbands, and in sports and medical applications.

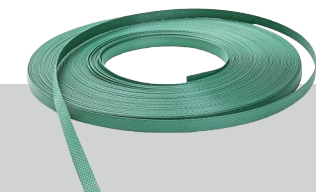

Ribbons

Our ribbons are suitable for a wide range of products such as climbing and camping safety belts, backpack straps, tents, personal protective equipment, sports and fitness gear, sports bags, fitness equipment, children's leashes, pet leashes, pet collars, pet carriers, military, police and fire safety belts, gift box handles, bags, luggage straps, and more.

Nylon Straps

Nylon straps are widely used in fashion, home textiles, sofas, footwear, gift packaging, hats, hang tags, luggage, Chinese knots (ropes), decorations, pendant cords, pet supplies, lighting, curtains, electronic products (headphone cords), eco-friendly bags, automotive accessories, bookmarks, hair accessories, DIY crafts, embroidery materials, traditional Chinese festivals, emotional symbols (gifts), and more.

PP Straps

PP straps, also known as polypropylene yarns, are versatile materials with excellent plasticity, strong tensile strength, fatigue resistance, low density, good tensile impact performance, and ease of use. They have wide applications in various fields.

Elastic

Elastic ropes

Elastic ropes have a wide range of applications, including clothing, construction, transportation equipment, bundling, sports equipment, and more.

POLY Belt

POLY belt is a belt-shaped material made of polymer materials such as polyamide, polyester, polyurethane, and polyether. It is widely used in various fields such as packaging, transportation, construction, medical, and manufacturing industries. It has advantages such as high strength, abrasion resistance, corrosion resistance, high temperature resistance, and low temperature resistance.

Pet Leash

The pet leash is made of nylon material, featuring vibrant colors and excellent texture. It can be produced in various specifications and colors according to the characteristics of different pets. Special colors, jacquard patterns, heat transfer printing, and softening treatments can be applied. Moreover, it can be processed and assembled into finished pet leashes according to customer requirements.

SP Thread

SP thread is commonly used sewing thread made by twisting polyester short fibers. It has a slight fuzz on the surface and its tensile strength, luster, and abrasion resistance are superior to other threads. It is soft in texture, colorfast, available in a wide range of sizes, high in strength, resistant to aging, wear, corrosion by seawater, and has excellent elasticity.

MAIN EQUIPMENT

Crochet Machines

Used for producing crochet fabrics used in handicrafts, clothing, and home textiles. It improves fabric efficiency and quality while expanding design and innovation possibilities.

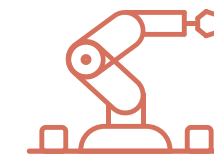

MAC

HINE

High-Speed needle machine

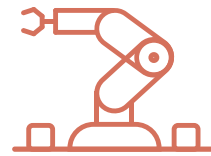

Our factory has a production capacity of 200 ,000m/day

High-Speed needle machine

These machines offer fast ribbon weaving, high automation, compact size, low noise, easy maintenance, simple operation, and high production efficiency, making them ideal for upgrading from traditional shuttle ribbon looms.

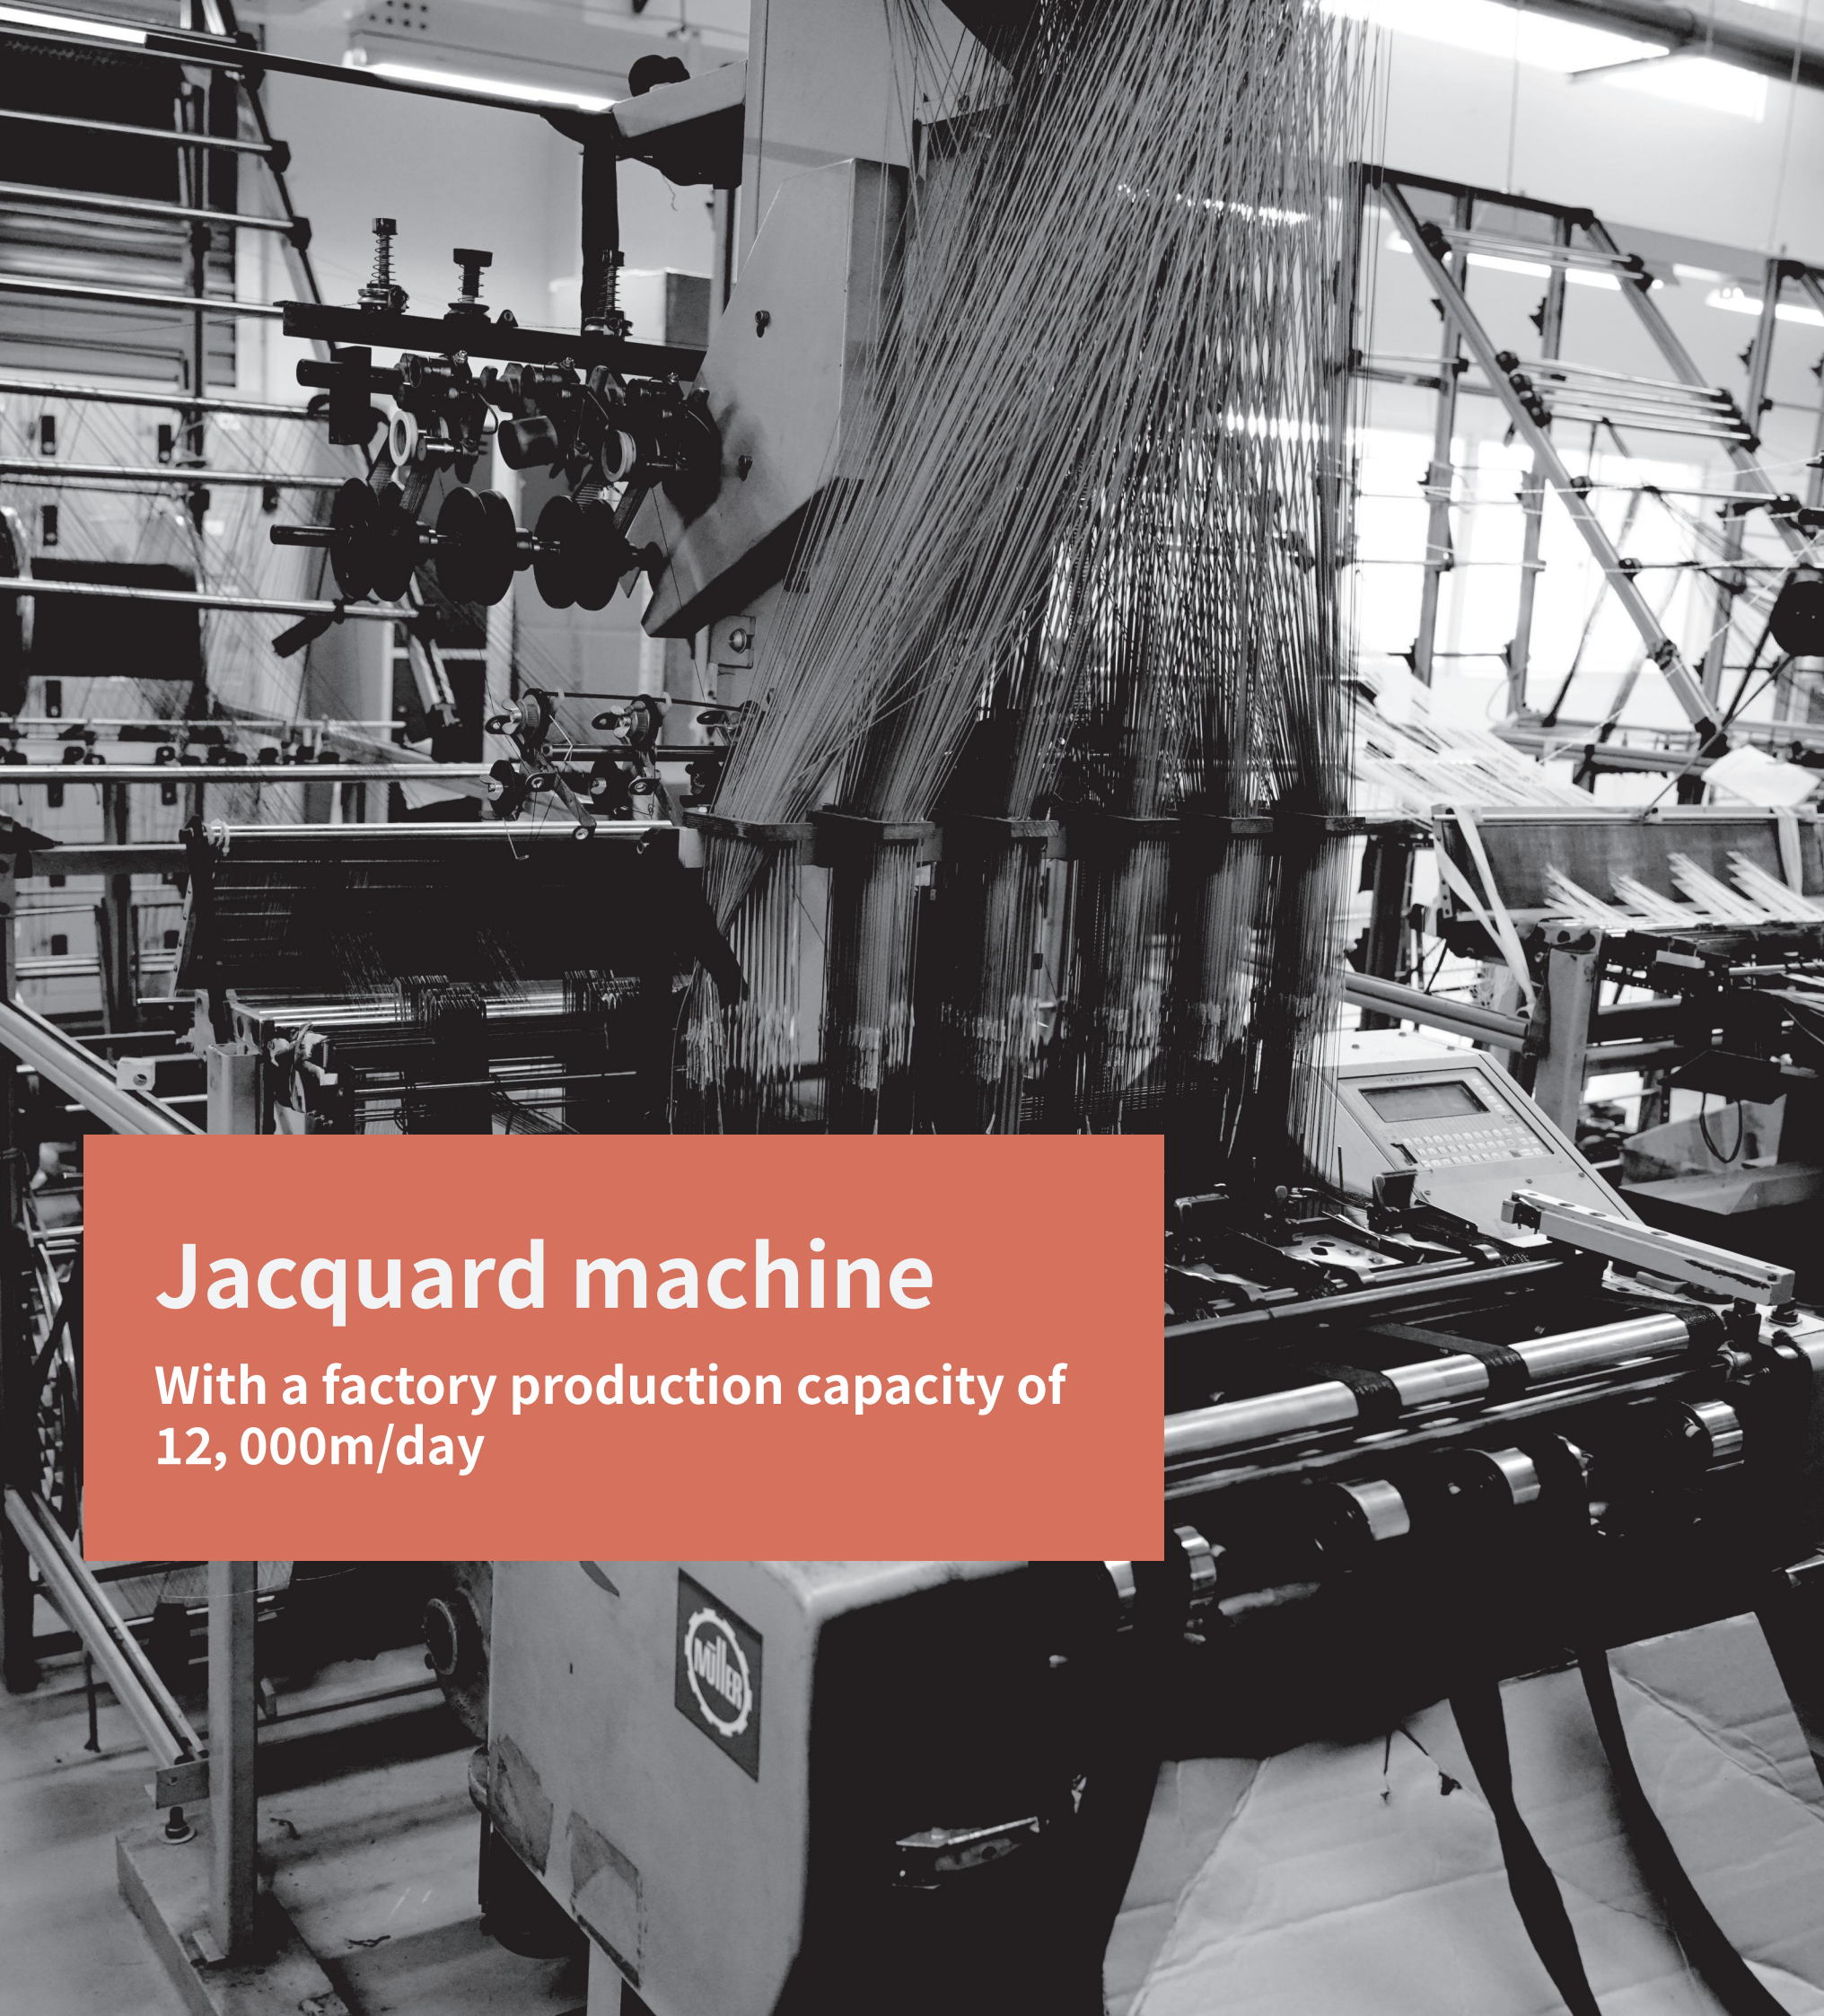

Breeding machine

The breeding machine greatly increase production efficiency, achieving 4-5 times faster production compared to low-speed looms. They are user-friendly and cost-effective.

Breeding machine
With a factory production capacity of
47 ,000m/day

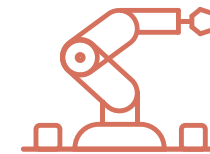

Jacquard machine

With a factory production capacity of
12,000m/day

Jacquard machine

Jacquard looms are used to produce intricate patterned fabrics. They employ computer control systems to achieve complex designs and enhance fabric efficiency and quality.
